

NIDHI PARAB

+1 (716) 970-9624 | Portfolio | nidhiparabmail@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Web Development: JavaScript, React, Vue.js, HTML, CSS, Tailwind CSS
Backend & Databases: Python, Django, Node.js, REST APIs, PostgreSQL, SQL
DevOps & Tools: Git, Docker, AWS, GitHub Actions, JIRA, Postman, Pytest

EDUCATION

University at Buffalo — *Master of Science in Computer Science* Aug. 2024 – Dec. 2025
University of Mumbai — *Bachelors of Engineering in Computer Engineering* Aug. 2020 – May 2024

PROFESSIONAL EXPERIENCE

Graduate Student Assistant Jul. 2025 – Present
University at Buffalo *Buffalo, NY*

- Spearheaded development of UB’s first centralized research management portal for **AI4ExceptionalEd**, a National AI Research Institute funded by NSF and IES, supporting research across 9 leading universities including Cornell, Stanford, and Penn State.
- Delivered full-stack platform with React, Tailwind CSS, Django, and PostgreSQL, enabling submission, tracking, and reporting for 200+ faculty, students, and collaborators nationwide. Architected and deployed secure Django REST APIs, reducing manual reporting effort by 60% and enabling real-time multi-institution data access.
- Implemented CI/CD pipelines with GitHub Actions and Docker containerization, accelerating release cycles from hours to minutes and ensuring reliable deployments. Optimized UI/UX, reducing load times by 35% across devices and increasing platform adoption and collaboration among distributed users

Founder & Developer Aug. 2025 – Present
Amber *Buffalo, NY*

- Launched Buffalo’s first platform in collaboration with UB Colab, helping new students and professionals build lasting friendships through interest-based group activities, city exploration, and engagement with local businesses.
- Developing MVP mobile app in Flutter with Firebase, PostgreSQL, and serverless Google Cloud microservices; designing a matching algorithm using user profiles and social graph clustering.

Product Development Intern Jun. 2025 – Aug. 2025
Crypt0nest.io *Austin, TX*

- Contributed to company achieving \$10K in initial revenue by delivering actionable insights via a scalable analytics platform.
- Engineered end-to-end data pipelines on Google Cloud Platform, processing 12M+ market records through ETL workflows and integrating data from Coinbase, CoinGecko OHLCV, RMSI, and other key indicators.
- Developed baseline XGBoost and efficient frontier models, implementing automated unit and integration testing, monitoring, and data validation for 95% reliability across all pipelines. Built interactive dashboards with JavaScript, integrating CI/CD workflows and version-controlled deployments to streamline model updates and visualization.

Software Development Engineering Intern Dec. 2022 – Mar. 2024
Indian Development Foundation *Mumbai, India*

- Built a full-stack platform using React (Next.js) and MySQL to digitize operations across 300+ nonprofit schools.
- Integrated REST APIs to centralize grading, teacher records, and school management in a unified dashboard.
- Optimized database queries and designed a seamless front-end experience, enabling staff to efficiently access, update, and manage institutional data.

PROJECTS

Colab Alarm Package — JavaScript, Python, Web APIs Apr. 2025

- Published open-source developer tool on PyPI with 1,000+ downloads, providing web-based audio notifications for Google Colab users. Leveraged browser APIs and **JavaScript** to implement interactive, reliable audio functionality.
- Designed lightweight API interface for seamless integration and minimal setup, improving usability for data scientists.

HVAC Management System — React, Vue.js, Django, PostgreSQL Apr. 2025

- Engineered a full-stack web application with **Vue.js** frontend and Django backend for maintenance task tracking across facilities.
- Implemented real-time updates, responsive UI, and modular component architecture, enhancing technician workflow efficiency.
- Utilized PostgreSQL for robust data storage and retrieval, ensuring data integrity and scalability.

GitHub Issue Finder CLI — Rust, GitHub API Oct. 2024

- Developed a command-line tool in **Rust** for discovering beginner-friendly GitHub issues, streamlining onboarding for new contributors. Integrated GitHub REST API with error handling and JSON parsing, ensuring reliable data retrieval for 50+ users.

LEADERSHIP & COMMUNITY ENGAGEMENT

Mentor, AnitaB.org UK: Trained 20+ mentees in ML fundamentals, data segmentation, and GitHub analytics workflows.
Microsoft Learn Student Ambassador: Conducted workshops including GitHub Fundamentals for 40+ participants
Rewriting the Code (RTC) Member: Organized Buffalo’s first city-wide RTC event connecting women in tech.
General Secretary, CSI: Led a 22-member committee; conducted events on OpenShift, Django, Web Development, and P5.js.
